

# GRADUATE SCHOOL

at the Max-Planck-Zentrum für Physik und Medizin

## About the Graduate Program

The International Max Planck Research School Physics and Medicine (IMPRS-PM) at the Max-Planck-Zentrum für Physik und Medizin (MPZPM) is a highly innovative new graduate program established in January 2022. IMPRS-PM educates and trains a new generation of scientists with insight into both physics and medical research.

In collaboration with the Friedrich-Alexander University Erlangen-Nürnberg (FAU), we offer **MSc stipends** and **PhD positions**. The language of instruction and interaction of our structured graduate program is English. Knowledge of the German language is not required, but we also offer German language classes at MPL and FAU.

Applications from entering master's students are processed in two rounds with deadlines on January 15<sup>th</sup> and May 31<sup>st</sup> for the academic year starting in the following October. Decisions are communicated by March 1<sup>st</sup> and July 1<sup>st</sup>, respectively.

Students with a master's degree who are interested in pursuing a PhD within IMPRS can apply and start at any time during the year.
