INPhINIT predoctoral fellowships at Instituto de Física Corpuscular IFIC - Valencia

The **Instituto de Física Corpuscular (IFIC)** offers **14 PhD positions within the INPhINIT programme**, promoted by the "La Caixa Foundation" with the European Commission's support through the Horizon 2020 MSCA Actions and COFUND programme.

The **Instituto de Física Corpuscular**, as "Severo Ochoa Centre of Excellence", is one of the top Spanish research institutions where the selected candidates can **carry out their PhD thesis funded by this programme**. IFIC is devoted to research in Particle, Astroparticle and Nuclear Physics and its applications to other fields of science and technology. IFIC covers both the theoretical and experimental aspects of these fields.

These early-stage researchers will enjoy a 3-year contract with very advantageous conditions. In addition, the **INPhINIT programme sets up a complementary skills training scheme** that includes **Technology Transfer and Entrepreneurship workshops**, and **Professional and Career Development sessions**.

The PhD positions cover the following research areas: theoretical particle and astroparticle physics, experimental particle physics at Large Hadron Collider and future colliders, experimental nuclear physics, neutrino telescopes and medical imaging.

The 14 positions offered at IFIC can be found here:
