Be the chosen one in our quantum multiverse

You are looking for a new opportunity in quantum science or the field of quantum technology?

We recommend Jena, a real paradise for quantum researchers. Jena is an outstanding and worldwide known technology location with a focus on photonics and optical technologies. It is an excellent environment for ground-breaking scientific discoveries and innovations. The close cooperation between science and industries enables a determined transfer of technologies to industry and society. We the Fraunhofer IOF and the Institute of Applied Optics represent two of the leading institutes in the field of quantum technologies.

Eight quantum research groups, in the field of communication, information, computing, and sensing offer exciting opportunities, to find your place in the flourishing quantum multiverse.
